## Profile

A motivated cyber security undergraduate focused on Java web development, networking, secure system thinking, and practical project building. Interested in becoming a professional Security Architect.

## Education

- SLIIT University - Cyber Security degree path
- D.S. Senanayake College - School education foundation

## Technical Skills

- Java and OOP: classes, objects, inheritance, interfaces, file handling
- Spring Boot: controllers, Thymeleaf pages, Maven project structure
- Networking: LAN design, routing and switching basics, Packet Tracer practice
- Web development: HTML, CSS, JavaScript, responsive design and animations
- Cyber security: secure thinking, risk awareness, access control basics

## Projects

- Bakery Order & Custom Cake Booking Platform - payment management and offer management contribution
- Office Network Design - floor-wise planning, switches, APs, rack and cabling ideas
- Animated Spring Boot Portfolio - personal website with AI guide, contact form, project popups and animations

## Career Goal

To become a Security Architect who can design secure, reliable, and scalable digital systems for real organisations.
